

F32 GUIDE FOR REVIEWERS

Ruth L. Kirschstein National Research Service Awards (NRSA) for Individual Postdoctoral Fellows (F32)

Purpose of the Award

- Provides support to promising postdoctoral applicants who have the potential to become productive and successful independent research investigators
- Offers an opportunity to enhance the applicant's understanding of the health-related sciences, within the broad scope of biomedical, behavioral, or clinical research or other specific disciplines relevant to the research mission of the participating NIH Institutes and Centers
- Applicants with a health professional doctoral degree may use the proposed postdoctoral training to satisfy a portion of the degree requirements for a master's degree, a research doctoral degree or any other advanced research degree program.
- Requires that the Nation's overall needs for biomedical research personnel be taken into account by giving special consideration to physicians and other health professionals who propose to become active biomedical researchers and who agree to undertake a minimum of 2 years of biomedical, behavioral or clinical research

Applicants

- Must have received a PhD, MD, DO, DC, DDS, DVM, OD, DPM, ScD, EngD, Dr PH, DNSc, ND (Doctor of Naturopathy), PharmD, DSW, PsyD, or equivalent doctoral degree from an accredited domestic or foreign institution
- Must not be engaging in studies leading to the MD, DO, DDS, DVM, or other similar health-professional degrees, or the clinical years of residency training.
- May be engaging in the research fellowship years of a research-track residency program
- Research clinicians must devote full-time to their proposed research training and confine clinical duties to those activities that are part of the research training program
- Individuals may receive up to three years of aggregated Kirschstein-NRSA support at the postdoctoral level, including any combination of support from an institutional training grant (e.g., T32 or T90) and an individual fellowship award (F32)
