

KTR Participant Outcomes

Sept 2010-Sept 2022

Grants: 256 grants were reviewed by KTR from Sept 2010 to Sept 2022; of these, 219 were submitted to NIH and have confirmed outcomes (excluding grants with pending awards).

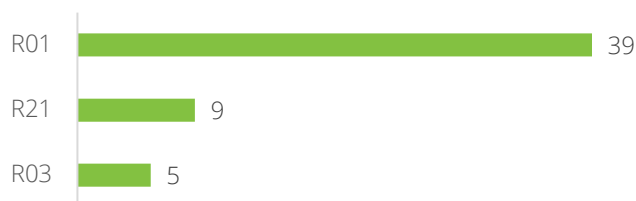

People: 187 individual investigators participated in mock study sessions from Sept 2010 to Sept 2022.

Grants Status

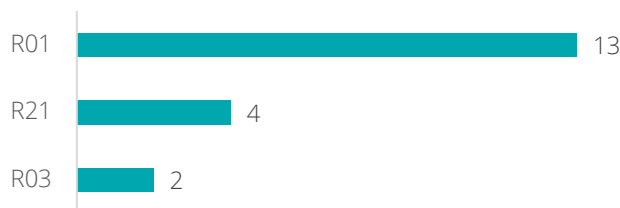

180 New submissions to NIH
29% 53 Grants were funded (verified by NIH Reporter)

53 Re-submissions to NIH
36% 19 Grants were funded (verified by NIH Reporter)

Funded Mechanisms (New Submissions)

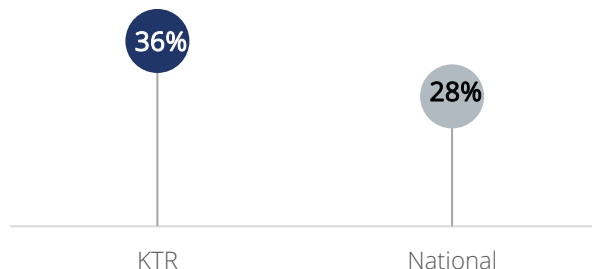

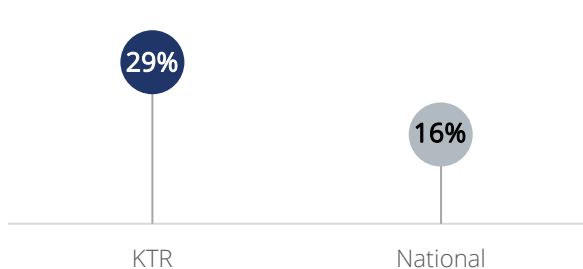

Funded Mechanisms (Resubmissions)

Success Rate

The **KTR success rate is almost double** the national rate for new NIH submissions.

The **KTR success rate is eight percent higher** than the national rate for NIH resubmissions.

The national success rates shown above include only the new R01, R03, and R21 submissions from 2013-2022. <https://report.nih.gov/funding/nih-budget-and-spending-data-past-fiscal-years/success-rates> (accessed 12/01/2023)

Amount

~\$120.3 M

(includes new NIH grants and resubmissions)

Non-NIH grants

19 grants reviewed by KTR were submitted to other federal and non-federal funding agencies. 6 were funded (total amount ~\$ 5 M, not verified by NIH Reporter).

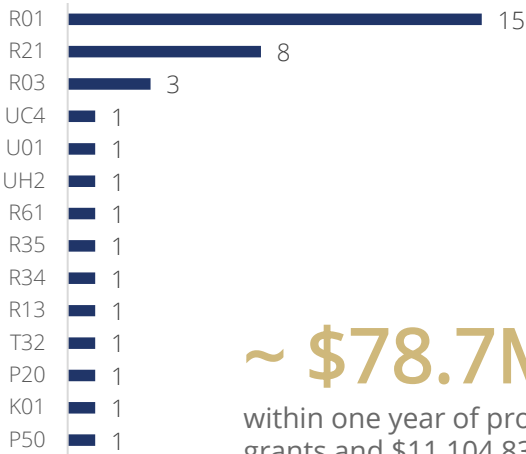

The dollar amount was the estimated total over duration of grants which were verified by NIH Reporter. Some grants were submitted to NIH as well as other agencies. If funded, the amount is only counted once. Not all non-NIH grants have verifiable funded amounts; therefore, the total dollar amount is actually higher than what is listed.

 188 additional grants were submitted within 1 year of KTR participation, but **NOT reviewed by mock study section** (new grants and resubmissions included).

45% Funded by NIH

82 of those grants were submitted to NIH;
37 of those grants were **funded** (verified by NIH reporter):

Funded Mechanism

57% Funded by Non-NIH

106 grants were submitted to Non-NIH;
60 were **funded**:

Agency	Submitted	Funded
Foundation	30	21
Institution/ University	11	9
Other, federal	8	4
Other, not reported	57	26
Total	106	60

~ \$78.7M estimated total of the additional grants submitted within one year of program participation (includes \$67,641,498 NIH confirmed grants and \$11,104,839 not confirmed by NIH Reporter).

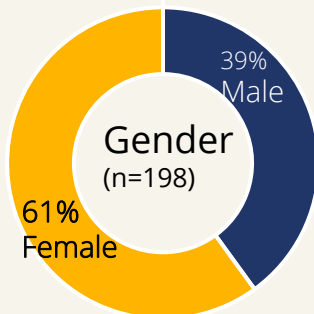

Demographics
(Cohorts 2010 - Sep 2022)

131 scholars with demographic information

13% 17 individuals identified as an underrepresented minority

Underrepresented minorities include individuals who identify as an unrepresented race or ethnicity (excluding White and Asian) or coming from a disadvantaged background including first generation college student, low-income family, or challenging environment (rural or inner-city). The Evaluation Center started to collect comprehensive demographic information beginning in 2017.

To what extent has the KTR review process helped you ...
